

TAXES PAID Million COP

Aware of the social and economic impact in the countries where it operates, Grupo Nutresa contributes to fiscal management and responsibilities

transparently. Through the policy and strategy developed, it seeks that tax management is framed in legal and ethical actions, complying with parameters of fair competition and achieving sustainable tax strategies over time, with the due observance of current tax regulations and transfer rates. This has led to having a very good relationship with and trust of the tax authorities in each country where we operate. In Colombia, we have managed to have legally stable contracts that allow us to reduce financial, reputational and continuity risks, significantly contributing to growth and social investment.
